

$$\mathcal{A} = \text{[Diagram 1]} + \text{[Diagram 2]} + \text{[Diagram 3]} + \dots$$

The image shows a mathematical equation for $\mathcal{A}$ as a sum of Feynman diagrams. The first diagram is a central orange vertex with four blue lines extending outwards. The second diagram is a bubble diagram with two orange vertices connected by two blue arcs, with two blue lines on each vertex. The third diagram is a chain of two such bubble diagrams, with two orange vertices and two blue lines on each. The sequence continues with an ellipsis.
